Dengue Epidemiological Surveillance

Health (https://www.datosabiertos.gob.pe/search/field_topic/salud-27)

Dataset of notification of dengue cases to the public health surveillance system of Peru

This dataset contains information on the notification of **dengue** cases to the public health surveillance system of Peru, managed and administered by the **National Center for Epidemiology, Prevention and Disease Control (CDC PERU)** . The data comes from the **National Epidemiology Network (RENACE)** , which is made up of **10,034 health facilities** of the Ministry of Health, EsSalud and others in the sector at the different levels of the Regional Health Directorates that Peru has. Of these, **8,105 are Notifying Units** , recognized with Directorial Resolution of the respective Health Directorates/Geresas of Peru. The information in the dataset is updated every week or month, according to the trend section of the epidemiological bulletin, and is provided weekly by RENACE. Data and analysis are provisional and may be subject to change. The dataset aims to provide information on the epidemiological situation of dengue in Peru, as well as facilitate access to purposes of research, education, prevention and control of this disease.

The dataset includes a historical series from 2000 to 2022, with data disaggregated by department, province, district, disease, year, week, diagnosis, type of diagnosis, health address, location, age, type of age and sex. The dataset includes the following variables:

FIELD	GUY	DENOMINATION	VALUES
department	Character	Geographic region	
province	Character	Province	
district	Character	Probable site of infection	
disease *enfermedad*	Character	Monitored diagnosis	DENGUE SIN SEÃ'ALES DE ALARMA = dengue without alarm signs DENGUE CON SEÃ'ALES DE ALARMA = dengue with alarm signs DENGUE GRAVE = death
year	Integer	Year	
week	Integer	Week of onset of symptoms	
diagnosis	Character	ICD 10	
dx_type *tipo_dx*	Character	Diagnosis type	C= Confirmed, P = Probable, S = Suspected
diresa	Character	Health direction that notifies	
ubigeo	Character	Probable site of infection code	
age *edad*	Character	Patient age	
age_type	Character	Patient age type	A = Year, M = Month, D = Days
sex	Character	Sex	M = Male, F = Female
